For almost ten years we have been manufacturing and marketing a food product called Hemp Hearts (shelled hemp seed) which, by laboratory analysis, is an excellent source of protein, omega fats and essential nutrients, but which contains virtually no sugar or starch.

Please describe yourself and the length of time that you have been using Hemp Hearts:

I am a 67 year old female who has been using 'Hemp Hearts' for the past seven years, and have experienced an increase in my energy levels and a slow but steady weight loss to a healthy level.

We claim that because of the protein content of Hemp Hearts those who eat five heaping tablespoons of Hemp Hearts early each morning will not normally be hungry at lunch time and will be able to avoid the starches usually consumed for lunch.

Please describe your experience regarding hunger and Hemp Hearts:

my lunch consists of 3oz of game meat or fish plus green vegetables or salad, usually with hemp hearts sprinkled on veg/salad.

We claim that because of the essential fat content of Hemp Hearts that unless an individual is considerably overweight or extremely active, most individuals who eat five heaping tablespoons of Hemp Hearts each morning will have sufficient energy until evening.

Please describe your experiences regarding energy and Hemp Hearts:

dinner is usually 2% organic plain yogurt with hemp hearts

We advise customers that Hemp Hearts should be eaten for breakfast with unblended raw fruit and vegetables (no fruit for diabetics) so that the long fibers in these foods will knit wastes together to ensure that individuals are not too loose, but that they clean out thoroughly.

Please describe your experiences regarding digestive health and Hemp Hearts:

Every morning I make a greens & fruit smoothie and I also consume a half bar of 'More than a square meal'. I find this maintains my blood sugar levels so that I have energy and no 'brain fog'
