For almost ten years we have been manufacturing and marketing a food product called Hemp Hearts (shelled hemp seed) which, by laboratory analysis, is an excellent source of protein, omega fats and essential nutrients, but which contains virtually no sugar or starch.

Please describe yourself and the length of time that you have been using Hemp Hearts:

I am 49 years old, an extremely active female, owned a dance studio for 30 years and also teach yoga. I have been using hemp hearts for two years.

We claim that because of the protein content of Hemp Hearts those who eat five heaping tablespoons of Hemp Hearts early each morning will not normally be hungry at lunch time and will be able to avoid the starches usually consumed for lunch.

Please describe your experience regarding hunger and Hemp Hearts:

I have 2-3 tablespoons of hemp hearts in my cereal or yogurt in the morning and then I can go without getting shaky. I am hypoglycemic and hemp hearts are the only thing I have found that help prevent the shakes.

We claim that because of the essential fat content of Hemp Hearts that unless an individual is considerably overweight or extremely active, most individuals who eat five heaping tablespoons of Hemp Hearts each morning will have sufficient energy until evening.

Please describe your experiences regarding energy and Hemp Hearts:

My energy level is good until at least 9pm and I am extremely busy all day.

We advise customers that Hemp Hearts should be eaten for breakfast with unblended raw fruit and vegetables (no fruit for diabetics) so that the long fibers in these foods will knit wastes together to ensure that individuals are not too loose, but that they clean out thoroughly.

Please describe your experiences regarding digestive health and Hemp Hearts:

Definitely this statement is totally accurate. I have very regular bowel movements within one hour every morning when I eat hemp hearts.
